Numeracy

Numeracy sessions gave the students the opportunity to reply show their creative thinking and problem solving skills. There was time for active exploration of maths topics, with chalk clock faces drawn on the playground and an angle estimation competition. Particular mention to **Charlotte Whitsey** and **Millie Lloyd-Rogers** for some excellent responses throughout, and to all of Group A for their calm and clear mathematical thinking. **Steph Lloyd-Rogers** won the number chain race in her group during Week 1, keeping cool under pressure from some tough competition.

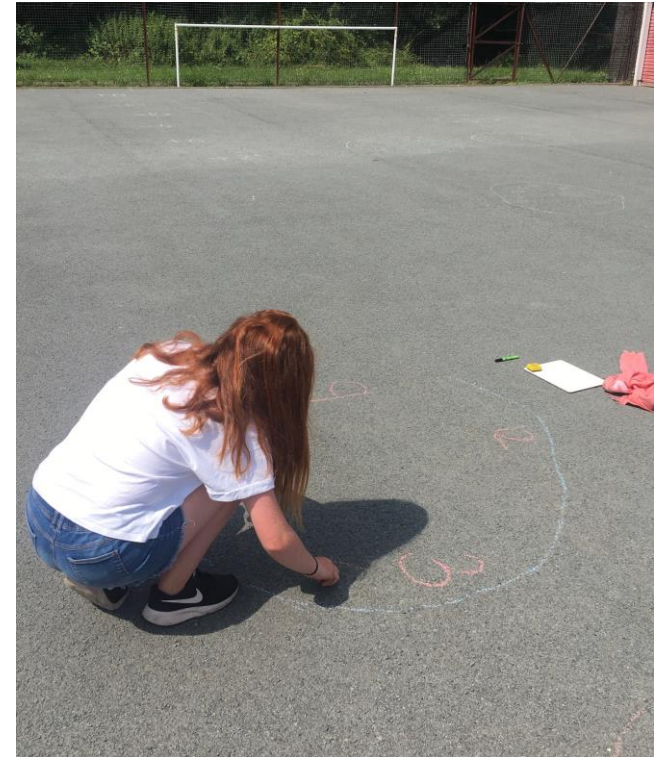

Numeracy

We had a great second week, with all of the groups planning and delivering a role play Charity Event, planning and budgeting to maximise profits, 'visiting' each others' stalls with some virtual money, and then calculating the sums raised for charity. There was an excellent end to the summer school with **Abi Richards and Kyle** in Group C showing great sportsmanship during the final Escape Room, where the children had to use teamwork to solve a series of mathematical puzzles in order to crack the code and unlock the lollipop treasure.

The World Around Us

Escape room puzzles, an orienteering map reading challenge, and survival skills for the wild were some of the activities that students completed during their 'the world around us' sessions. From cracking fiendish sudokus to cooking on a camp fire, the students showed great enthusiasm for problem solving and an eagerness to learn new skills.
