FREEDOM OF INFORMATION PUBLICATION SCHEME

Introduction: what a publication scheme is and why it has been developed

One of the aims of the Freedom of Information Act 2000 (which is referred to as FOIA in the rest of this document) is that public authorities, including schools, should be clear and proactive about the information they will make public. To do this we must produce a publication scheme, setting out:

- The classes of information which we publish or intend to publish
- The manner in which the information will be published
- Whether the information is available free of charge or a charge is payable

The scheme covers information already published and information which is to be published in the future. All information in our publication scheme is either available for you on our website to download and print off or available in paper form.

Some information which we hold may not be made public, for example personal information.

This publication scheme conforms to the model scheme for schools approved by the Information Commissioner.

This publication scheme commits an authority to make information available to the public as part of its normal business activities. The information covered is included in the classes of information mentioned below, where this information is held by the authority. Additional assistance is provided to the definition of these classes in sector specific guidance manuals issued by the Information Commissioner.

The scheme commits an authority:

- To proactively publish or otherwise make available as a matter of routine, information, including environmental information, which is held by the authority and falls within the classifications below
- To specify the information which is held by the authority and falls within the classifications below
- To proactively publish or otherwise make available as a matter of routine, information in line with the statements contained within this scheme
- To produce and publish the methods by which the specific information is made routinely available so that it can be easily identified and accessed by the members of the public
- To review and update on a regular basis the information the authority makes available under this scheme
- To produce a schedule of any fees charged for access to information which is made proactively available
- To make this publication scheme available to the public.
- To publish any dataset held by the authority that has been requested, and any updated versions it holds, unless the authority is satisfied that it is not appropriate to do so, to publish the dataset, where reasonably practicable, in an electronic form that is capable of re-use, and, if any information in the dataset is a relevant copyright work and the public authority is the only owner, to make the information available for re-use under the terms of the Re-use of Public Sector Information Regulations 2015, if they apply, and otherwise under the terms of the Freedom of Information Act section 19. The term “dataset” is defined in

section 11 (5) of the Freedom of Information Act. The term “relevant copyright work” is defined in section 19 (8) of that Act.
