First Aid Policy

Introduction

The School will conform to all statutory legislation and recognises and accepts its responsibility as an employer for providing so far as reasonably practicable, a safe and healthy work place and working environment, both physically and psychologically, for all its employees, volunteers, and other workers. The school also recognises that its responsibility for the safety and welfare of all the pupils at the school is paramount. First Aid matters, if necessary, will be raised at Staff Briefing and staff meetings. First Aid notices will be prominently displayed and all staff / new pupils will be informed about First Aid arrangements during induction.

1. First-aid provision at Droitwich Spa High School:

This comprises:

- a) A suitably stocked and labelled first-aid container situated in the school office.
- b) Trained First Aiders to take charge of first-aid arrangements. (Appointed persons until HSE approved training can be accessed)
- c) Information for employees, pupils, parents/carers on first-aid arrangements.
- d) First-aid provision available at all times while people are on school premises, and on off-site visits where a risk assessment has indicated this might be necessary (e.g. sports activities)
- e) The mini bus has a stocked first aid box and a portable one is carried on outside visits.

2. Responsibilities

Health and safety legislation places duties on employers for the health and safety of their employees and anyone else on the premises. The School is responsible, under the Health and Safety at Work etc. Act 1974 (HSWA) and under the regulations. This should include arrangements for first aid, based on a risk assessment of the school, and should cover:

- numbers of first-aiders/ appointed persons;
- numbers and locations of first-aid containers;
- arrangements for off-site activities/ trips/work experience. This does not conflict with the responsibility of the employers or colleges to undertake a risk assessment to identify significant risk and necessary control measures when pupils below the minimum school leaving age are on or off site.
- Out of school hours arrangements e.g. letters, parents evenings.
- Droitwich Spa High School will provide qualified First Aiders who have received training approved by the HSE and updated every 3 years. One First Aider will always be on call and lists of qualified First Aiders monitored and updated at regular intervals.

Teachers' conditions of employment do not include giving first aid, although any member of staff may volunteer to undertake these tasks. Teachers and other staff in charge of pupils are expected to use their best endeavours at all times, particularly in emergencies, to secure the welfare of the pupils at the school in the same way that parents might be expected to act towards their children. In general, the consequences of taking no action are likely to be more serious than those of trying to assist in an emergency. Adequate and appropriate training and guidance is given to staff who volunteer to be first aiders/ appointed persons. There will be enough trained staff to meet the statutory requirements and assessed needs. First aiders must complete a training course approved by the Health and Safety Executive (HSE) and ensure they receive refresher training every 3 years.

In school, the main duties of a first-aiders/appointed person are to:

- Give immediate help to casualties with common injuries or illnesses and those arising from specific hazards at school;
- When necessary, ensure that an ambulance or other professional medical help is called.
- Enter details of injuries and treatment outcome in the appropriate record. * Administer medication and keep appropriate records.
- Take charge when someone is injured or becomes ill
- Look after the first-aid equipment e.g. restocking the first-aid container;

3. Procedure in case of accident, injury, defects or hazards

In case of an accident at the school, the following procedures should be followed:

- The injured party should be seen by a qualified First Aider/Appointed Person
- If the injuries cannot be treated at the school arrangements should be made for transportation to hospital. Whilst we are waiting for our Appointed Persons to be fully trained it may be that pupils with quite minor injuries will need to be seen by appropriately qualified medical personnel.
- All witnesses must complete an Accident Report; Accident Reports can be found in the administration area at the Centre.
- If the accident is as a result of an incident on site, all parties involved and any witnesses need to file an incident report.

4. Hygiene/ Infection Control

All staff should take precautions to avoid infection and must follow basic hygiene procedures. Staff should have access to single-use disposable gloves and hand washing facilities, and should take care when dealing with blood or other body fluids and disposing of dressings or equipment.

5. Record Keeping

Droitwich Spa High School keeps a record of any first aid treatment given by first aiders/appointed persons. This includes:

- the date, time and place of incident;
- the name (and class) of the injured or ill person;
- details of the injury/ illness and what first aid was given;
- what happened to the person immediately afterwards (for example went home, resumed normal duties, went back to class, went to hospital);
- Name and signature of the first aider or person dealing with the incident.

All employees are reminded that they are responsible for any defects in the equipment or damage to their classrooms and should report such to the Site Manager. Any damage to the building that could be dangerous should also be reported to the Site Manager immediately.

6. Emergency Situations

From April 2004 First Aiders must be trained to recognise and respond appropriately to the emergency needs of children with chronic medical conditions the most common one asthma, diabetes, epilepsy and severe allergic reaction.

Children with asthma need to have immediate access to their reliever inhalers when they need them. Spare inhalers must be provided by parents and kept in an unlocked cabinet by schools.

Children with epilepsy-concerns about safety should be discussed with the child and parents as part of the health care plan. Children with diabetes should be able to manage their own medication. This should be discussed with child and parent as part of the health care plan.

Anaphylaxis– parents and child should discuss allergies as part of the health care plan. Pre-loaded injection devices should be provided by the parents in the correct container, labelled with their child's name and updated medicines.

If the school has to give this injection an **ambulance must always be called.**

7. Child Protection

If any concerns are raised that have Safeguarding implications (eg unexplained marks or scars), whilst a person is being treated for first aid, the First Aider must inform the designated Child Protection officer who will then take appropriate action.

8. Physical Contact with Children

The treatment of children for minor injuries, illness or medical conditions may involve members of staff in physical contact with children. Any treatment should:

- not involve more contact than necessary;

- be undertaken by staff who have volunteered to be designated to the task;
- be carried out wherever possible, in front of other children or adults;
- be recorded in appropriate methods.

Parents should be informed of any treatment administered.

9. First-Aid Materials, Equipment and Facilities

First-aid equipment must be clearly labelled, easily accessible and up to date. Pupils' individual medical containers must be clearly marked on the outside and contain their health care plan plus up to date medicines provided by the parents.

1. From 1st October 2016 Schools could carry a generic inhaler and spacer for all students – thus reducing the risk of students not having a working inhaler at the time of an attack. These packs are ordered from our normal first aid supplier and the Head signs an agreement that she is happy for us to keep and administer this medication when required. These packs are available in the medical room and also in the PE department. External trips and visits also request one of these packs to take with them as well as a first aid kit.
2. From 1st October 2017 school will carry and administer a generic epi-pen. Parents will still be required to provide two pens within school; one kept with student, one kept in medical as a backup. These are monitored for deterioration and expiry dates and parents are emailed or called to inform them replacements are needed. These can be ordered from our first aid supplier and same will apply with regard to consent and paperwork. Epi-pens will also be available for trips. Staff will be trained on the effective use of these pens.
3. List of current first aiders on the portal and in the staff room and with the site team.

10. Appointed First Aiders

An up to date list of appointed first aiders is kept on the school Portal

12. First Aid containers

Contents of a first-aid container: All first aid containers contain the correct contents (as recommended by the DFEE Guidance) to provide first aid to our client groups.

The First-aid/ Appointed Person is responsible (Tracy Lakin) for examining the contents of first-aid containers. They are checked frequently and restocked as soon as possible after use. Items are discarded safely after the expiry date has passed.

Travelling first-aid containers: Before undertaking any off-site activities, the responsible person assesses what level of first-aid provision is needed. A portable first-aid container is maintained in a good condition and readily available for use; prominently marked as a first-aid container. Minibus first-aid containers:

Transport Regulations require that the minibus has on board a first-aid container.

13. COVID – First Aid process and procedures.

We are committed to minimising contact with individuals who are not well and responding quickly. If a student is showing symptoms of coronavirus (COVID-19) (a new continuous cough, a high temperature, or a loss of, or change in normal sense of taste or smell - anosmia), or if we become aware that someone in their household who is, the student will be:

- Removed from their Zone and escorted to reception.
- Temperature taken and logged.
- Isolated in a COVID room away from the school population. (After collection from school, the room is cleaned and ventilated after each use. In addition, there is a separate COVID-19 toilet only to be used by COVID-19 symptomatic students or staff).
- Parents / Carers contacted and asked to collect their child from school.
- Parents / Carers will be:
 - Advised to seek a test as soon as possible. (They will also be handed a leaflet providing advice and guidance on how to respond and acquire a test. (See Appendix A). The advice and guidance provides links to www.gov.uk/coronavirus)
 - Asked to self-isolate – if symptomatic or tested positive, 10 days isolation from the onset of symptoms. Alternatively, until a negative test return.
 - Asked to contact school to let us know the outcome of the test as soon as possible.

COVID related issues are logged and reported as per DfE guidelines and there is a separate First Aid room for general first aid issues for students and staff who are not symptomatic.

Droitwich Spa High School will engage with the NHS test and trace process and respond rapidly to confirmed cases. We will contact Public Health England: Health protection Team as per Government guidance and respond to direction accordingly.

Where necessary, trained First Aiders will work safely and abide by full PPE guidance.

Appendix A

Coronavirus Information

For more information about Coronavirus please visit the Government web site at:
<https://www.gov.uk/coronavirus>.

Main Coronavirus Symptoms:

The main symptoms of coronavirus are:

- **a high temperature** – this means you feel hot to touch on your chest or back (you do not need to measure your temperature)
- **a new, continuous cough** – this means coughing a lot for more than an hour, or 3 or more coughing episodes in 24 hours (if you usually have a cough, it may be worse than usual)
- **a loss or change to your sense of smell or taste** – this means you've noticed you cannot smell or taste anything, or things smell or taste different to normal

Most people with coronavirus have at least 1 of these symptoms.

What to do if you have symptoms:

If you have any of the main symptoms of coronavirus:

1. **Stay at home (self-isolate)** – do not leave your home or have visitors. Anyone you live with, and anyone in your support bubble, must also self-isolate.
2. **Get a test** – get a test to check if you have coronavirus as soon as possible. Anyone you live with, and anyone in your support bubble, should also get a test if they have symptoms.

How to obtain a test to see if you have Coronavirus

Anyone who has symptoms of coronavirus (COVID-19) can ask for a free test to check if they have the virus. This is called an antigen test.

There is another type of test (antibody test) that checks if you've already had the virus. This test is not widely available yet. You can [find out about antibody testing on GOV.UK](#).

Where can I get Advice?

If you need medical advice about your symptoms:

- England: [NHS 111 online coronavirus service](#)
- Scotland: [NHS inform](#)
- Wales: [NHS Direct Wales](#)
- Northern Ireland: get advice from a GP or GP out-of-hours service

Babies and young children under 5

- Call 111 if you're worried about a baby or child under 5.
- If your child seems very unwell, is getting worse or you think there's something seriously wrong, call 999.
- Do not delay getting help if you're worried. Trust your instincts.

Who can ask for a Test

You can ask for a test:

- for yourself, if you have coronavirus symptoms now (a high temperature, a new, continuous cough, or a loss or change to your sense of smell or taste)
- for someone you live with, if they have coronavirus symptoms

You can get 1 test for each person with symptoms.

This service is for people in England, Scotland, Wales and Northern Ireland.

In England and Wales, you can ask for a test for a child who lives with you, whatever their age. In Scotland and Northern Ireland, you can only get a test for your child if they are aged 5 or over.

If you're asking for a test for someone else, and the person is aged 13 or over, check they're happy for you to ask for a test for them.

What the test involves

The test usually involves taking a swab of the inside of your nose and the back of your throat, using a long cotton bud.

You can do the swab yourself (if you are aged 12 or over) or someone can do it for you. Children aged 11 or under cannot do the swab themselves. Their parent or guardian will have to swab test them.

There are 2 ways of getting a test. You can:

- book an appointment at a drive-through or walk-through test site
- ask for a home test kit – this will be delivered to your home

If you get a home test kit, you will need to do the test and return the kit in the next 48 hours. You will be told how to do this.

When to Ask for a Test

DO NOT WAIT – ask for a test as soon as you have symptoms. You need to get the test done in the first 5 days of having symptoms.

How to Ask for a Test

Booking on line at: <https://www.nhs.uk/ask-for-a-coronavirus-test>

Or by phoning the NHS line 119
